DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 3-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to claims 1 and 3-5, the prior art discloses a radiographic apparatus that comprises: radiation emitting means for emitting radiation toward an object under examination; a flat-panel x-ray detector for detecting radiation after the radiation is emitted toward the object under examination; signal sampling means for taking radiation detection signals from the flat-panel x-ray detector at fixed sampling time intervals; and time lag removing means for determining lag-free radiation detection signals by subtracting a radiation detection signal for a lag-behind part from the respective radiation detection signals by a recursive computation, on an assumption that, of the radiation detection signals taken by the signal sampling means at the fixed sampling time intervals, the radiation detection signal for a lag-behind part left unread from the flat-panel x-ray detector within the fixed sampling time intervals, to be read at a next reading time and added to a radiation detection signal actually read at the next reading time, is due to an impulse response formed of one exponential function or a plurality of exponential functions with different attenuation time constants; the radiographic images being derived from the lag-free radiation detection signals obtained by the time lag removing means. However, the prior art fails to disclose a time lag removing means that is arranged to perform the recursive computation for removing the lag-behind part from each of the radiation detection signals based on equation A

$$x_k = y_k - \sum_{n=1}^{N_r} \alpha_n \left(1 - e^{T_n}\right) b^{T_n} S_{nk} \text{ as claimed.}$$

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Amendment

3. Applicants' amendments filed on 05 December 2007 with respect to claim 1 have been fully considered. The objection of claim 1 has been withdrawn.
4. Applicants' amendments filed on 05 December with respect to claims 1 and 3-5 have been fully considered. The rejection of claims 1 and 3-5 under 35 U.S.C. 103(a) has been withdrawn.
5. Applicants' terminal disclaimers filed on 05 December with respect to claims 1 and 2 have been fully considered. The rejection of claims 1 and 2 on the ground of nonstatutory obviousness-type double patenting has been withdrawn.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
 - (1) Nagaoka *et al.* (U. S. Patent No. 7,003,071 B2) disclosed time-lag removing.
 - (2) Stierstorfer (U. S. Patent No. 6,949,746 B2) disclosed a time-lag removing means.
